

Merging CSV files

NAME: HARISH M

CSV File:

```
import os

import glob

import pandas

def detail_67(eff="c:\in Extracted ",c:/users /HomePc / Documents /detail_67.csv");

os.chdir(eff)

file=glob.glob("*.csv)

dep=[]

colname=["RecordID","StepTime","RelativeTime","RealTime","AuxiliaryChannel,Gap of Temperature]

for far in file:

    print(filename)

    ff=pandas.read_csv(fra,header=None)

    dep.append(eff)

    dep=pandas.detail_67(eff,axis=0)
```
